

## Entrée Phone 603

### What are the features?

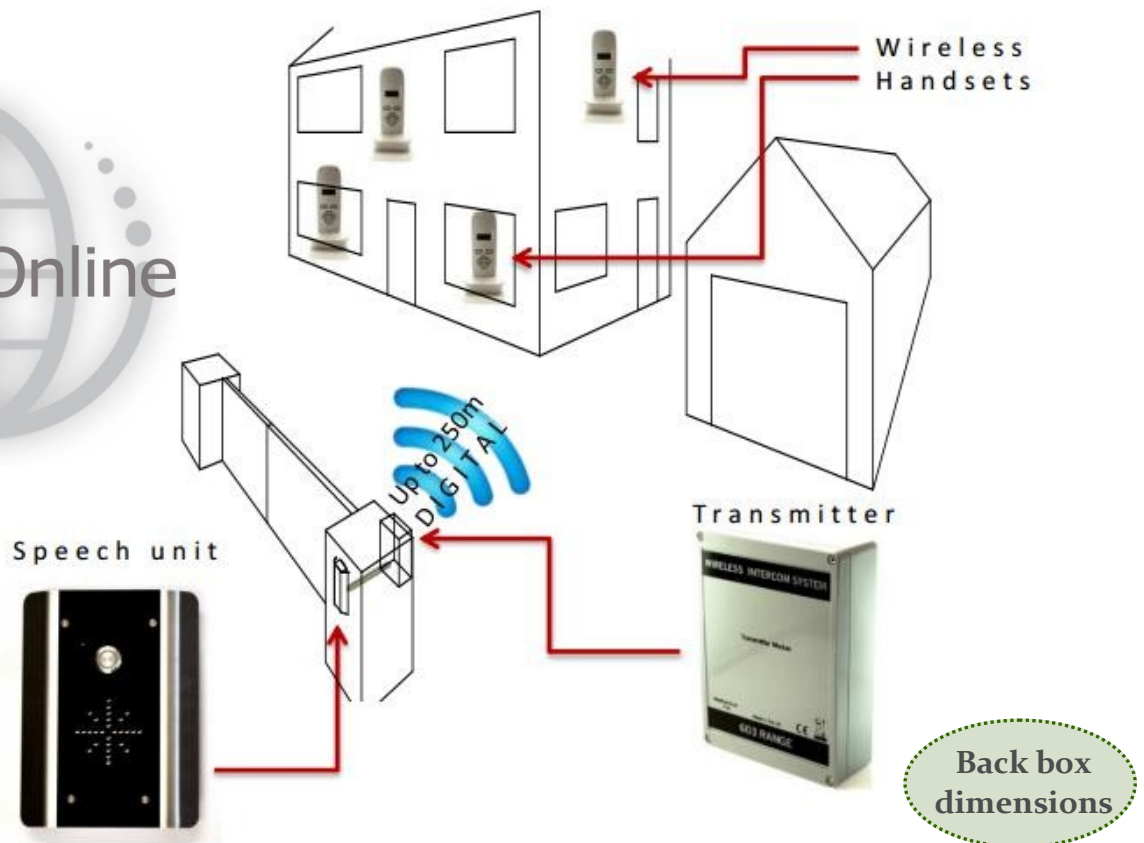

- 250 Meter Range
- Stainless Steel with Blue LED Light on system
- Up to 4 handsets available per system
- 2 relays
- Keypad access available
- Built in Voicemail service - up to 16
- Handset voicemail playback
- Digital D.E.C.T Wireless intercom system
- Make internal calls between handsets
- Easy to setup and install.

The new Entrée Phone 603 allows you to open your front door or gate from a handset in the house, using wireless technology. With up to 4 handsets, the intercom system is activated when the visitor presses the button on the outside system which then calls the handset inside your home. With one press of a button the door or gate will release, allowing a visitor to enter a property, without you having to go and greet them. The Keyless access system also has a benefit of a keypad, allowing all members of the house accessibility at all times. With a working range of 250m, the handsets also have a built in voicemail service of up to 16 missed calls, with handset play back.
