

Weatherproof Strike Release

Designed for installations where waterproof and dustproof features are required, such as external gate installations and sterile environments.

Features a protected gasket seal and has a holding force over 400kg measured at the jaw.

Also features a manual hold-open function by twisting the black turn snib, and has a built-in MOV (metal oxide varistor) to protect your electronic devices.

Overview

- Weatherproof and Dustproof IP65
- Gasket sealed
- Manual hold-open function
- Mortice installation
- Handed - right or left
- CC version available
- Built-in MOV (metal oxide varistor)
- Holding force: 400kg
- Cycle tested to 300,000 operations

Technical Details

Product Specifications

Weatherproof IP65
Dustproof IP65
Mortice installation
Handed - right or left
CC version as standard
Built-in MOV (metal oxide varistor)
Holding force: 400kg
Cycle tested to 300,000 operations

Electrical Specifications

Power input: 12Vdc
Consumption: 180mA

Dimensions

Dimensions: 100 x 21,5 x 37mm
Environment: -15°C to +40°C

Product Variants

Weatherproof and Dustproof Electric Strike - Right handed
Weatherproof and Dustproof Electric Strike - Left handed
