READ ALL THE INSTRUCTIONS BEFORE INSTALLING OR OPERATING POST. SHOW THE POST OPERATING INSTRUCTIONS TO ANYONE USING THE POST.

A. INSTALLATION.

Excavate out a hole deep enough to take post plus a base of compact stone/hardcore. **Take care to check for buried cables or pipes.** Concrete around top of post so that post top is at ground level. Form concrete under support lugs to help hold post in position. **NOTE:** Never fit a post without post end cover.

B. POST OPERATION.

To operate post use lifting ring. Fully raise post (Fig 2) then rotate post 1/4 turn clockwise so that ring support is aligned with cut out in top plate. In this position the post will remain latched, and hole for Lock Bar is also aligned with cut out in top plate.

**WARNING:** Never place your finger in lock bar hole even with post latched. Severe injury could result should post fall/telescope inward.
To Operate Lock. Insert key, rotate 1/4 turn anti-clockwise and insert into hole in post. Turn key 1/4 turn clockwise and remove key. Fit plastic cover over lock bar head.

To Unlock. Insert key, rotate 1/4 turn anti-clockwise and remove from hole.

NOTE: Only remove lock bar when post is in its latched position. Should post be resting on lock bar head raise and latch post before attempting to remove lock bar.

Lowering Post.

Once lock bar has been removed lower post by rotating 1/4 turn anti-clockwise whilst supporting post weight on lifting ring, then slowly lower post. Do not allow post to fall un-supported. Ensure lifting ring folds down into
