

# ZT-BZ4 4 Way Bell Splitter

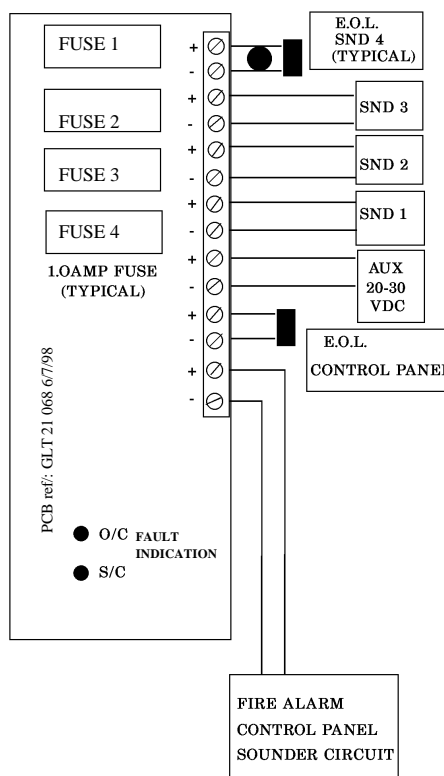

## Description

The ZT-BZ4 is a four way expansion unit designed to be used with any fire alarm control unit with reversal type bell monitoring. The unit monitors both open and circuit faults, as well as transmitting fault signal to the main fire control panel.

## Features

- Compact design
- Can be used with any control panel
- All sounders/bells must be polarised
- Remotely triggered

## Technical specifications

Model	PART No.
ZT-BZ4	48.031 PCB only 4 way bell splitter.
ZT-BZ/A	48.032 PCB with enclosure.
ZT-BZ4/C-1 amp	48.034 PCB complete with 1.0 amp P.S.U. unit in enclosure.
ZT-BZ4/D-5 amp	48.035 All with 5.0 amp P.S.U. unit in enclosure.
Rated Input	24-30 VDC
Alarm Output	1.0 amp fused. Each
Board Dimensions	60 x 135mm
